

OKLAHOMA ROCKS!

Back by popular demand, the Newspapers In Education program is proud to bring you Oklahoma Rocks! 2011.

Teachers, sign up today to receive this free educational program for your classroom.

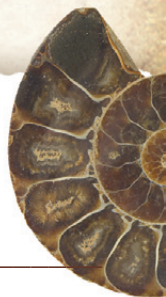

This third Oklahoma Rocks! program will give your students a scientific understanding of Oklahoma's exciting and distinct geological regions. For each region, Oklahoma Rocks! will explore the impact of past geological change on the landforms and scenery that are present today. The activities that are unique to each region will give students an inside look at how that region's geology impacts their daily lives.

The Oklahoma Rocks! Program is targeted for grades 7 through 12 and includes:

- Delivery of one classroom set (25 copies) of the printed student workbooks.
- Digital delivery of The Oklahoman containing each of six in-paper program lessons on Tuesdays from October 18 through November 22.
- Downloadable teacher's guide available at <http://nie.newsok.com>.

Registration form must be received by September 30, 2011 to receive the student workbooks.

YES! My class would like to participate in Oklahoma Rocks!
